

Spaceballs "THE MONEY SAVER"

# Spaceball & Spaceball Inserter

**Advantages of Spaceballs:**

- Stop Panel Rattle
- Centers Solid Panels
- Compresses if Panels Expand
- Helps Eliminate Cracking Panels
- Will Eliminate Most Major Call-Backs

*New Ball Size!  
.232" Spaceball  
for 3/16" (5mm)  
flat panel  
application.*

Spaceballs are used in the manufacturing of solid panel wood doors; they fit in the rail and stile quite easily and fast - and - they don't fall out. Once they are in the frame it is back to standard door construction.

Spaceballs keep the panel centered. No more problems with those unsightly lines when the panel moves, which is a problem that is time consuming to fix, and time is money!

*Food for thought: The news of a door assembled poorly seems to travel a lot faster than that of one which is free of defects!!*

Over compressing by more than half the diameter of the Spaceball can cause wood discoloration.

SPACEBALLS

Part #	Description	Price per 1,000			
		1,000	10,000	25,000	50,000
SPBALLS.190	.190 Dia. (Black)	\$21.90	\$15.40	\$14.90	\$12.50
